

The MP-100 Panel is the ideal panel for complicated roof planes involving many hips and valleys. The seam design allows panels to be installed in two directions from a center panel. This allows for better roof symmetry and easier installation with less waste. The MP-100 Panel is ideal for curved roofs; concave or convex.

MP-100 Standard Clip (MP100SC)

- Architectural (solid substrate) applications.
- Separate snap-on seam allows panels to be installed in two directions.
- Application on 3:12 slopes and greater.
- Continuous panel lengths. Field forming available.
- Easy panel to install on complicated and multiple roof planes.
- Ideal for roof slope transitions or eave turn-downs.
- CURVING: MP-100 Panels can be installed over barrel style roofs (consult MPS for minimum radius requirements).
- Can be tapered for conical shaped roofs.
- Surface patterns include smooth, striated, pencil ribs, and bead ribs.
