

4x5 CORRUGATED DOWNSPOUT

Commercial Grade Downspout

OVERVIEW

PRODUCT: The MPS 4X5 downspout is a heavy duty commercial grade downspout system. The profile is a corrugated downspout with a double lock seam.

APPLICATION: All types of construction including commercial, industrial, and residential. For both steep sloped or flat roof systems

LENGTHS: Downspout sections are factory formed in lengths up to 40'-0" long.

MATERIALS: 4X5 downspout is available in heavy duty 24 ga. steel, .032" aluminum, or 16 oz. copper.

KYNAR 500 FINISH: Standard material finish is premium fluoropolymer coatings produced with full strength Kynar 500 or Hylar 500 resin. Full strength Kynar 500 or Hylar 500 finishes carry a 20 year guarantee against cracking, peeling, and fade (not to exceed 5 N.B.S. units). These are the highest exterior grade finishes available
