SR .27 SRI 24

**Champagne**  
SR .37 SRI 37

**Copper Metallic**  
SR .51 SRI 58

**STEEL PRODUCTS  
FOR THE METAL  
ROOFING AND METAL  
BUILDING INDUSTRY**

- > Final color selection should be made from actual color chips.
- > For the most current information, visit [unitedsteelsupply.com](http://unitedsteelsupply.com).
- > A 35-year limited paint warranty is available for all colors upon written request. Please inquire. (Outside the continental United States, please inquire).
- > Solar Reflectivity (SR): Solar reflectivity or reflectance is the measure of a material's ability to reflect solar energy or sunlight from its surface. SR values are numbered 0 to 1.0. A value of 0 indicates that the surface absorbs all solar energy and a value of 1.0 indicates total reflectance.
- > Solar Reflectance Index (SRI): The SRI is used to determine compliance with LEED requirements and is calculated according to ASTM E 1980 using values for reflectance and emissivity. To meet LEED requirements, a roofing material must have an SRI of 29 or greater for steep slope roofing and an SRI value of 78 or higher for low slope roofing. For more information, visit [usgbc.org](http://usgbc.org).

**SHERWIN-WILLIAMS**  
Coil Coatings
