

# MP-100 PANEL

Standing Seam Series

## OVERVIEW

The MP-100 Panel is the ideal panel for complicated roof planes involving many hips and valleys. The seam design allows panels to be installed in two directions from a center panel. This allows for better roof symmetry and easier installation with less waste. The MP-100 Panel is ideal for curved roofs; concave or convex.

MATERIAL	STANDARD WIDTHS	OPTIONAL WIDTHS
24 ga. Steel	14"	12", 18"
22 ga. Steel	14"	12", 18"
.032" Aluminum	14"	
.040" Aluminum	14"	
16 oz Copper	13"	12", 18"

\*Aluminum & Copper available in limited quantities, please call for further availability

## PRODUCT FEATURES

- Architectural (solid substrate) applications only
- Continuous panel lengths
- MP-100 Panels can be installed over barrel style roofs (consult MPS for minimum radius requirements)
- Separate snap-on seam allows panels to be installed in two directions
- Jobsite fabrication available
- Can be tapered for conical shaped roofs
- Application on 3:12 slopes and greater
- Easy panel to install on complicated roof planes
- Ideal for roof slope transitions or eave turn-downs
- Surface patterns include smooth, striated, pencil ribs, and bead ribs
